

**Tomar a vacina contra
rotavírus ajuda a nos proteger
de uma doença transmitida
pela água contaminada.**

FATO OU FAKE?

A água transparente e sem
cheiro é sempre segura
para beber.

FATO OU FAKE?

Beber água parada pode
causar dengue.

FATO OU FAKE?

**Tomar a vacina contra poliomielite
ajuda a nos proteger de uma doença
que pode ser disseminada pela falta de
saneamento básico.**

FATO OU FAKE?

A vacinação é importante para proteger a saúde da população afetada por calamidades como enchentes, por exemplo.

FATO OU FAKE?

Deixar caixas d'água abertas ou jogar lixo em terrenos pode aumentar a chance de se pegar dengue.

FATO OU FAKE?
